Midterm - entire class period

Hi everyone,

For Tuesday night let's spend the entire period on the midterm exam - once you are finished and submitted you can leave for the night. It will be challenging but given it's worth 15% of grade, I want to give you time to do your best - I've updated the study guide.

For the exam I'll be giving you printed instructions and any math formulas needed to complete the exam and build you models.

From Canvas you will download 2 Excel workbooks and upload them back as submissions - one for PowerQuery work and the other for models. The model workbook will already have formatting and clearly show the cells and places to enter your formulas and answers.

One other note - I thought it clear from the study guide, but want to emphasize that closed book/closed notes obviously means no browser or AI. You'll be working in Excel and Canvas only.

Any questions please let me know.
